

# Open Evening

## Female Reproductive Health Assessment and Egg Freezing

Presentation, question time and refreshments at Bridge on Thursday 11th February 2010, from 18:00–20.00

Breakthroughs in diagnostic and scientific techniques now offer women the opportunity to gain a better understanding of their reproductive health and their future options.

Today, many women face serious and difficult choices in their attempts to balance home and career, also in the challenges of relationships which may or may not be long term and a platform for starting a family.

This is when better knowledge of personal reproductive health can, at least, help with decisionmaking and, while Bridge will never advise any delay in starting a family, we strongly believe in patient choice and will provide as much information to help you as we can.

This Open Evening explains Bridge's unique approach to hormonal testing, describes the Ovarian Assessment Report and reviews a variety of treatment options including Egg Freezing and Egg Donation.

The Bridge team will be led by Nataly Atalla MRCOG PhD MSc, one of the world's leading authorities on fertility, and Scientific Director, Dr. Alan Thornhill BSc PhD. Attendance is free and confers no obligation – but places are limited – please book in advance.

For further information and to reserve your place(s) call us on 020 7089 1449 or email [bridge@thebridgecentre.co.uk](mailto:bridge@thebridgecentre.co.uk).
