Donor Sperm – two purchase options and no need to wait for treatment

[See Donor Catalogue](#)

The availability of donor sperm has been an issue of growing concern ever since the changes to the anonymity laws came into effect in April 2005. These changes, coupled with increased regulatory requirements, have resulted in a nationwide shortage of donor sperm.

Bridge is addressing the regulatory constraints, firstly by embarking on a major campaign to recruit donors under the new regulations – and we are succeeding.

Bridge donor sperm is immediately available in two ways – per treatment which provides the most cost-effective way of obtaining UK donor sperm or via DonorShare which guarantees availability for multiple treatments/sibling stock.

£550 per Treatment

Bridge donor sperm is available for immediate use on a 'per treatment' basis at £550 per sample.

See our Donor Catalogue or contact Bridge Cryoservices on 020 7089 1444.

Bridge DonorShare

Bridge **DonorShare** is a new approach to making UK donor sperm available under the current regulatory conditions.

By purchasing a **DonorShare** you are reserving one of the ten pregnancies for each donor allowed by the HFEA. It is an HFEA requirement that each sperm donor is limited to ten births/families (multiple births within a family are allowed). Each **DonorShare** purchaser will be guaranteed sufficient sperm for the intended course of treatment, even if several cycles are required.
