

## OUR SUCCESSES – PREGNANCY RATES

January - September 2007

At Bridge, we are committed to monitoring our clinical and laboratory procedures to maintain the highest standards. Our IVF and ICSI results in this period are excellent and comparable to the best in the UK.

Pregnancy rates for IVF and ICSI embryo transfer using own eggs						
Jan - Sept 2007						
Maternal Age	<35	35-37	38-39	40-42	43-44	>44
<b>Positive pregnancy test (no. of procedures)</b>						
Per egg collection	49% (259)	47% (206)	35% (165)	24% (165)	11.5% (26)	0% (17)
Per embryo transfer	51% (250)	50% (191)	38% (152)	28% (141)	14% (22)	0% (16)
<b>Clinical pregnancy rates (no. of procedures)</b>						
Per egg collection	42% (259)	36% (206)	30% (165)	16% (165)	0% (26)	0% (17)
Per embryo transfer	43% (250)	39% (191)	32% (152)	18% (141)	0% (22)	0% (16)

Complete statistics for 2005 are available on the Human Fertilisation and Embryology Authority website [www.hfea.gov.uk](http://www.hfea.gov.uk)
